Devils Tower National Monument

A national movement to preserve and conserve began right here when Devils Tower was proclaimed the first national monument in 1906 by President Theodore Roosevelt. The formation rises to 1,267 feet above the Belle Fourche River, just across the South Dakota border in Wyoming. Native American Indian legend holds that the rock sprang up just in time to save two girls from a bear. The fluted nature of the rocks formed from the bear pawing at the rock. Devils Tower, formed by the intrusion of igneous material, is a sacred site for many Native Americans and is enjoyed by hikers and climbers for the activities offered at the monument. (Please note that the National Park Service asks climbers and hikers to refrain from activity inside the Tower Trail Loop for the month of June.)

Bear Butte State Park

That sacred stillness you feel here is real to generations who have come here to offer prayers and feel close to the spirit of the mountain. Mato Paha or "Bear Mountain" is the Lakota name given to this site, formed millions of years ago. Separated from the rest of the Black Hills by more than a mile, Bear Butte, a 1,200-foot tall geological formation, offers an expansive view of its surroundings. An easy hike takes you around Bear Butte Lake. A more challenging hike takes you to the summit on a 1.8 mile-long trail. Today, the ancient ceremonies of the past still take place at the mountain. The mountain is a sacred place to the Lakota, Cheyenne and all the indigenous tribes of the Northern Plains, whose respectfully undisturbed offerings can be seen in the pieces of colorful cloth, tied bundles and pouches left behind.

Roughlock Falls Nature Area

Picture perfect doesn't begin to describe the power of this landscape. Overflowing the limestone cliffs of Spearfish Canyon, the Roughlock Falls flow from the Little Spearfish Creek. The spectacular sight is a prime view for photographers, so much so that the cinematographers of "Dances with Wolves" decided to film final scenes here. The nature area offers bird watching, wildlife viewing, fishing and picnicking. Due to limited upper lot parking, hiking the beautiful one-mile trail from the lower trailhead is encouraged.

George S. Mickelson Trail

The adventure of your life just might be found on a friendly, well-maintained trail. Built on an abandoned railroad line, the Mickelson Trail spans 109 miles from the Northern Black Hills to the southernmost point. Hikers, bicyclists, horseback riders and runners love the low-grade trail which takes them through ponderosa forests, the granite peaks of Deadwood Gulch and the long prairie grasses and rolling foothills of the Cheyenne River Valley. Ruins of old mines, granite tunnels, towering railroad trestles and cold mountain creeks are all an integral part of the Mickelson Trail.

27 miles west of Rapid City – U.S. Hwy/385.

Trail open daily / year-round

Trailheads, services available.

For more information, call **605-584-3896** or go online to mickelsontrail.com.

Angostura Recreation Area

Take a surprisingly beachy side trip – 36 miles of shoreline promise sunbathing, picnicking, dive-worthy fun at one of the few large reservoirs in western South Dakota. Angostura Reservoir is known for its crystal waters, excellent camping, sandy beaches and fine fishing. This portion of the Cheyenne River was originally set aside for irrigation but has grown into a major recreation spot. With three marina locations, recreation and concession services are easily available, including access to 155 boat slots and a beach club with rental lodges and an outdoor pool.

70 miles southeast of Rapid City – S.D. Hwy/79 and U.S. Hwy/385.

Open daily / year-round
